

## 2009-2013 Ford F150 2wd &amp; 4wd Front Coilover

King Shocks 12472 Edison Way Garden Grove, CA 92841  
714-530-8701 [www.kingshocks.com](http://www.kingshocks.com)

**Front Parts List:**

- 2 – 2.5 IFP Front Coilover Shocks (25001-211) - or -
- 2 – 2.5 Remote Reservoir Front Coilover Shocks (25001-213)
- 2 – Front Reservoir Mounts (25044-100 left & 25044-101 right)
- 1 – Hardware Kit **IFP Shock** (KH02-137)
- 1 – Hardware Kit **Remote Reservoir Shock** (KH02-111)

**Tools Required:**

- Floor Jack/Jack Stands
- Metric Socket/Wrench Set
- Standard Socket/Wrench Set

**Ford F150**  
**OEM PERFORMANCE SERIES**

**FRONT:** With the vehicle on level ground, set the emergency brake and block the rear tires. Using a floor jack, raise the front end and support the frame rails with jack stands for safety. Then remove the front tires. **NOTE: Never work under an unsupported vehicle.**

1. Unbolt the brake line brackets so the suspension is not hanging by the brake/ABS lines during disassembly and installation. Unbolt brackets using a 10mm socket. Unbolt the ABS line from the upright using an 8mm socket.

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

This kit does not require welding. Do not weld on any component. Welding may void the warranty and/or cause the product to fail. If any parts are missing, or for tech assistance; Contact King Off Road Racing Shocks: 714-530-8701 Most important after the install, Feel the difference and have fun.

2. Disconnect the tie rod from steering knuckle. Using a 21mm socket, loosen the nut on the tie rod end. Separate the tie rod end from the knuckle using the proper ball joint tools and remove tie rod end from steering knuckle.

3. Disconnect the upper A-arm from the upright. Using a 21mm socket, loosen the nut on the A-arm ball joint. Separate the ball joint from the upright using proper ball joint tools.

4. Remove the lower bolt from the shock assembly. Using a 30mm socket, remove the nut then remove the bolt.

5. Using a 15mm socket, remove the three nuts from the top of the shock assembly and remove the shock.

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

This kit does not require welding. Do not weld on any component. Welding may void the warranty and/or cause the product to fail. If any parts are missing, or for tech assistance; Contact King Off Road Racing Shocks: 714-530-8701 Most important after the install, Feel the difference and have fun.

**FOR REMOTE RESERVOIR SHOCKS ONLY:** For those installing IFP shocks skip to page 6, step 14.

6. **4wd** – Locate the tow hooks at the front of frame and remove the two bolts from tow hooks. Place the reservoir mount on the tow hook and install the two factory bolts you just removed. Reservoir brackets are side specific, see photos for proper mounting. For those with tow hooks, you are done with reservoir bracket mounting... skip to page 5, step 13.

7. **2wd** – For 2wd models and vehicles without tow hooks you must remove bumper to install reservoir brackets if access to mounting points is not available. First remove the two bolts for the lower air dam using a 13mm socket and remove the air dam.

8. Open the hood to access the hood latch bolt and two other bolts that need to be removed. Use a 10mm socket for the hood latch bolt and an 8mm socket for the other two bolts. Also, make sure the hood latch cable is unclipped from the fascia.

9. Be sure to unplug the fog lights (if applicable)

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

This kit does not require welding. Do not weld on any component. Welding may void the warranty and/or cause the product to fail. If any parts are missing, or for tech assistance; Contact King Off Road Racing Shocks: 714-530-8701 Most important after the install, Feel the difference and have fun.

10. Locate the four main bumper mounting studs at front of frame rails and remove the nuts using a 21mm socket. Make sure bumper is clear for removal and remove bumper.

11. With the bumper removed you can now access the tow hook holes in the frame. Position the reservoir mount on the frame (as shown in the photos below) and install using the supplied 10mm hardware.

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

This kit does not require welding. Do not weld on any component. Welding may void the warranty and/or cause the product to fail. If any parts are missing, or for tech assistance; Contact King Off Road Racing Shocks: 714-530-8701 Most important after the install, Feel the difference and have fun.

12. Once the reservoir mounts are secured you can reinstall the bumper in the reverse order it was taken off.

13. Install King Remote Reservoir Shocks by first feeding the reservoir through the hole at the top of the shock mount. Be aware that the shocks are side specific, the reservoir will route towards the front of vehicle as shown in the photos below.

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

This kit does not require welding. Do not weld on any component. Welding may void the warranty and/or cause the product to fail. If any parts are missing, or for tech assistance; Contact King Off Road Racing Shocks: 714-530-8701 Most important after the install, Feel the difference and have fun.

14. Line up the holes in the upper mounting plate on coilover with the upper mount on the vehicle and use the supplied 3/8" bolts and washers to attach the new coilover to the factory upper mount. Thread the bolts in enough to hold shock in place but do not tighten yet.

15. Line up the lower mount and reuse the factory bolt. Install the bolt and nut but do not tighten yet.

16. For Remote Reservoir Shocks: Route the hose behind the fender liner and position the reservoir in the reservoir bracket. Use the provided hose clamps to secure the reservoir to the reservoir bracket.

**With Compression Adjuster**

**Without Compression Adjuster**

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

17. Using a 9/16" socket, torque the 3/8" upper shock mount bolts to 35 ft/lbs. Torque the lower shock mount bolt to 406 ft/lbs. using a 30mm socket.

18. Reconnect the upper A-arm.

19. Reconnect the tie rod.

20. Install the brake line/ABS line brackets.

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.

**DOUBLE CHECK ALL HARDWARE:** Make sure everything is installed correctly and all hardware is tight before reinstalling tires. Install tires, remove jack stands and lower vehicle to the ground. Recheck all hardware and lug nuts after 100 miles and periodically after that as part of routine maintenance.

**Alignment is critical:** A professional alignment must be performed before driving this vehicle at highway speeds. Do not attempt to drive your vehicle after this install without having the alignment readjusted to factory specs!

**IMPORTANT:** Read all instructions thoroughly from start to finish before beginning the install. Check parts list and make sure all parts are included in the kit. If the instructions are not properly followed severe frame, driveline and/or suspension damage may result. Check for frame and suspension damage prior to installation.
